WEATHER CONDITIONS – Simonsberg, Stellenbosch

Winter was late, but cold enough to break dormancy
Low rainfall hence low soil moisture levels which lead to stress later in the season
Ideal spring which lead to good even bud burst
Warm weather especially from end October to end January
This lead to restricted growth, smaller berries and lower bunch mass
The harvest was a week earlier
The harvest was smaller than previous years

WINEMAKING
The bunches were sorted and placed whole into the tanks. The tanks were allowed
to slowly start fermenting naturally with two to three pump overs a day taking place.
Post fermentation, they were given three weeks extended skin contact before being
taken down to used French oak barrels for malolactic fermentation. The wine stayed
in the barrels for twelve months.

GRAPE VARIETIES
100% Syrah

PRODUCTION
4,000 cases - 24,000 bottles

ANALYSIS
Alcohol: 14% Vol.
Total Acidity: 5.2 g/L
pH: 3.66
